

ROTARY FILLING/SEALING MACHINES

RM-18 Series

An eight-pocket rotary machine for containers up to 8oz (227gr). The system is a monobloc with a cup dropper, filler, foil placed, heat sealer, and discharge station. Ideally for 75mm cups up to 81mm.

CONTAINER SIZES

Various fillers for liquids and dry products including pistons, augers, volumetric, and volumetric by time.

APPLICATIONS

Thin to thick liquid products including chunky sauces, beverages, dairy, cosmetics and personal care supplies, and dry products including granular products.

RM-36 / RM-36x2 Series

An eight-pocket rotary 1-2 up configuration machine for containers up to 32oz (907gr). The system is a monobloc with a cup dropper, filler, foil placer film applicator, heat sealer, and discharge station. Ideally for 4 5/8" / 410 mm Diameter max.

Various fillers for liquids and dry products including pistons, augers, volumetric, and volumetric by time, even multiple fillers.

Thin to thick liquid products including chunky sauces, beverages, dairy, cosmetics and personal care supplies, and dry products including granular products.

RM-36x3 Series

An eight-pocket rotary 3 up configuration machine for containers up to 32oz (907gr). The system is a monobloc with a cup dropper, filler, foil placer film applicator, heat sealer, and discharge station. Ideally for 4 5/8" / 410 mm Diameter max.

Various fillers for liquids and dry products including pistons, augers, volumetric, and volumetric by time, even multiple fillers.

Thin to thick liquid products including chunky sauces, beverages, dairy, cosmetics and personal care supplies, and dry products including granular products.

RM-48 Series

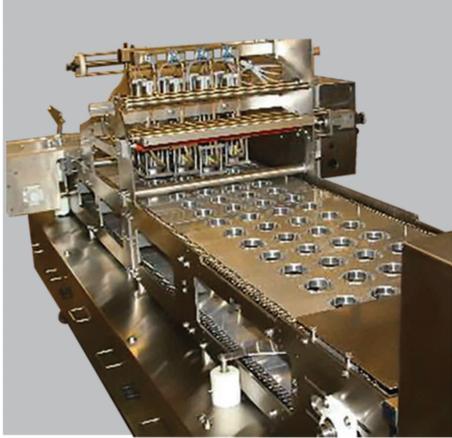

An eight-pocket rotary machine for containers up to 80oz (2268gr). The system is a monobloc with a cup dropper, filler, foil placer/film applicator, heat sealer, and discharge station. Ideally for 6" / Diameter max / This machine runs 2 cups at a time configuration.

Various fillers for liquids and dry products including pistons, augers, volumetric, and volumetric by time, even multiple fillers.

Thin to thick liquid products including chunky sauces, beverages, dairy, cosmetics and personal care supplies, and dry products including granular products.

IN-LINE TRAY SEALING MACHINES

4 Lane In-Line

A 4 lane In-Line machine for containers up to 32oz. The system will drop a cup, fill, Seal with foil or film applicator/ heat sealer, place an overcap and discharge onto a conveyor.

2 Lane Model also available.

CONTAINER SIZES

Various fillers for liquid and dry products Including pistons , augers, volumetric and volumetric by time even multiple fillers.

APPLICATIONS

Thin to thick liquid products including chunky sauces, beverages, dairy, cosmetics and personal care supplies, and dry products including granular products.

6 Lane In-Line

A 6 lane in line machine for containers up to 32oz . The system will drop a cup, fill, Seal with foil or film applicator/ heat sealer, place an over cap and discharge onto a conveyor.

8 Lane Model also available.

Various fillers for liquid and dry products Including pistons , augers, volumetric and volumetric by time even multiple fillers.

Thin to thick liquid products including chunky sauces, beverages, dairy, cosmetics and personal care supplies, and dry products including granular products.

Square Cut Tray Sealer

The “Fresno Machine” seals trays and bowls efficiently with roll stock film. The Square Cut Tray Sealer features no scrap and 100% material usage, it’s an economical solution for rectangular trays and bowls.

Various fillers for liquids and dry products including pistons, augers, volumetric, and volumetric by time, even multiple fillers.

Thin to thick liquid products including chunky sauces, beverages, dairy, cosmetics and personal care supplies, and dry products including granular products.

Die Cut Tray Sealer

8-foot long inline sealing machine with variable speed, sealing 18-25 per minute (single lane) or 35-50 per minute (two lanes). Containers are hand-loaded, with an optional tray dropper available. Extend it for more work space. Machine comes tooled for one container size.

Various fillers for liquids and dry products including pistons, augers, volumetric, and volumetric by time, even multiple fillers.

Thin to thick liquid products including chunky sauces, beverages, dairy, cosmetics and personal care supplies, and dry products including granular products.

AUXILIARY EQUIPMENT

Accumulation Tables

Rocket Machine Works offers a wide variety of accumulating table options from small to large diameter packaging accumulating tables.

CONTAINER SIZES

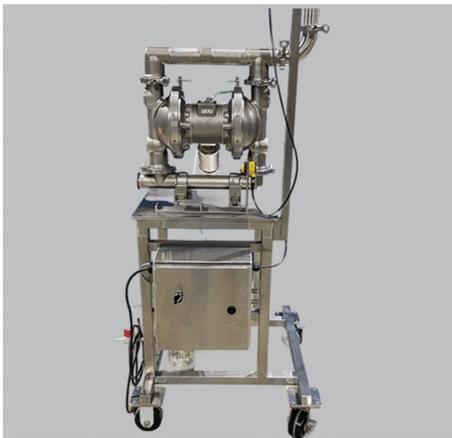

Various fillers for liquid and dry products including pistons, augers, volumetric and volumetric by time even multiple fillers.

APPLICATIONS

Rotating Side Walls or Non-Rotating options available.

Integrate with our machines or your existing equipment.

Transfer Pumps

The Pneumatic Piston Transfer Pump gently moves viscous products without altering crushing the product. Designed with a sanitary valve, it's mobile, wash-down ready, and offers manual or sensor-based control.

Various fillers for liquid and dry products including pistons, augers, volumetric and volumetric by time even multiple fillers.

Thin to thick liquid products including chunky sauces, beverages, dairy, cosmetics and personal care supplies, and dry products including granular products.

Piston Fillers

Our piston fillers can fill volumes from 1-128 ounces in one shot. All construction is of the highest standards and will provide easy, no-tools clean up. It will come with a foot pedal for manual operation or can be configured to fit on an existing line or machine.

Various valves, nozzles and supply reservoir to suit a wide range of products.

Thin to thick liquid products including chunky sauces, beverages, dairy, cosmetics and personal care supplies, and dry products including granular products.

Benchtop Heat Sealer

Our Table Top Sealers come with servo driven film feed and are completely washdown capable. We use the same tooling and stainless steel that we use in our fully automatic machines for a very reliable unit.

Change parts to accommodate different containers.

Precut Cup/Foil Sealer
Roll-Stock Film Sealer
options available.

Applies roll film seals to plastic containers up to 168mm diameter.

Options like nitrogen flushing can be quoted upon request.

Rocket Machine Works has spent 30+ years engineering machines that fill & seal cups and trays with quality and precision. Made in-house in California's Central Valley, our equipment meets FDA, NSF & USDA standards, delivering reliable, affordable solutions with a focus on sanitary food production.

STANDARD FEATURES

- ✓ **Meets Or Exceeds Standards**
USDA, FDA, NSF (NEMA 4x, IP 67)
- ✓ **Servo Driven Fillers**
Change settings instantly, even while running.
- ✓ **Heavy Duty Build**
Designed for rugged, long-lasting performance.
- ✓ **Unlimited Recipes**
Store endless product configurations.
- ✓ **Easy Clean Washdown Components**
Built for sanitization. Safe for food production.
- ✓ **Touch Screen Controls**
Easy operation with intuitive interface.
- ✓ **Stainless Steel Construction**
Won't corrode or rust. Made in the USA.

MADE IN THE USA

**NEED A CUSTOM MACHINE?
WE WILL BUILD TO SUIT**

INDUSTRY APPLICATIONS

- ✓ **Retail Food Producers**
- ✓ **Schools / Hospitals / Prisons**
- ✓ **Commissary Facilities**
- ✓ **Deli & Cafeteria Production**
- ✓ **Ready-To-Eat Meals**
- ✓ **Commercial Kitchens**
- ✓ **Co-Packers**

Decrease **Labor Costs**

Enjoy many years of trouble-free productivity and increased profits

Eliminate **Downtime**

Wi-Fi enabled machines can be accessed & serviced remotely.
